Profile Summary

An aspiring IT professional with 2 years of experience in Python Development, AI Engineering, and IT Project Management with a strong background in Computing Science. I specialize in creating smart solutions, leading successful IT projects, and using technology to solve real human problems. I have worked on developing some AI tools leveraging LLM models, managing small to mid-level IT projects, and turning complex ideas into clear, practical plans that meet business goals on time and within budget. I look forward to managing diverse software/hardware projects involving Artificial Intelligence (AI) integration.
